REV104 17-JAN-2018

# Operating Systems 2018-1 (Room 3114 Tue/Thu)

## Class: A (10:00-12:00) | B (13:00-15:00) | C (16:00-18:00)

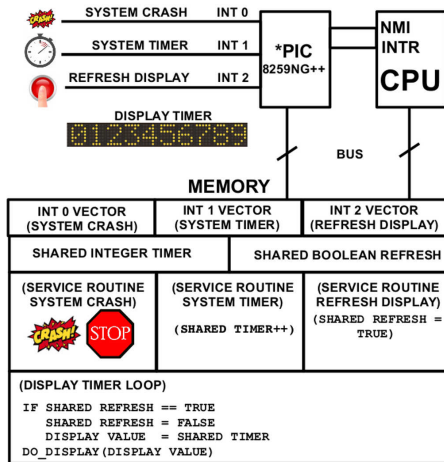

Week 00	06 Feb - 12 Feb 2018	Intro & Review1
Week 01	13 Feb - 19 Feb 2018	Review2 & Scripting
Week 02	20 Feb - 26 Feb 2018	Protection, Security, Privacy, & C-language
Week 03	27 Feb - 05 Mar 2018	I/O, BIOS, Loader, & Systemd
Week 04	06 Mar - 12 Mar 2018	Addressing, Shared Lib, & Pointer
Week 05	13 Mar - 19 Mar 2018	Virtual Memory
Reserved	20 Mar - 24 Mar 2018	
Mid-Term	26 Mar - 03 Apr 2018	(UTS)
Week 06	05 Apr - 11 Apr 2018	Concurrency: Processes & Threads
Week 07	12 Apr - 18 Apr 2018	Synchronization
Week 08	19 Apr - 25 Apr 2018	Scheduling
Week 09	26 Apr - 05 May 2018	File System & Persistent Storage
Week 10	07 May - 16 May 2018	I/O Programming & Network Sockets Programming
Reserved	17 May - 22 May 2018	
Final	23 May - 26 May 2018	(UAS)

# Agenda

- 1 Start
- 2 Jadwal
- 3 Agenda
- 4 Week 02
- 5 Goals and Principles of Protection
- 6 The Security Problem
- 7 Privacy
- 8 C Language
- 9 The End

# Week 02: Protection, Security, & C-language

- Reference: (OSCE2e ch13-4) (ETC 050-1 C001-8) (OLD 01)

Figure: How to protect and secure this design?

# Goals and Principles of Protection

- Principle of Least Privilege
- Domain Structure and Access Matrix
- Domain = set of Access-rights (eg. **user-id**).
- Access-right = <object-name, rights-set> (eg. object: file).

	File1	File2	File3	Printer
User1	Read		Read	
User2				Print
User3		Read	Execute	Print
User4	R/W		R/W	Print

- Access-right Plus Domain (Users) as Objects

	F1	F2	F3	Printer	U1	U2	U3	U4
U1	R		R			SW		
U2				Print			SW	SW
U3		R	EXEC	Print				
U4	R/W		R/W	Print	SW			

# Copy Rights

- Start

	File1	File2	File3
User1	Exec		Write*
User2	Exec	Read*	Exec
User3	Exec		

- User3: Read access to File2 (by User2)

	File1	File2	File3
User1	Exec		Write*
User2	Exec	Read*	Exec
User3	Exec	<b>Read</b>	

- Owner Rights

	File1	File2	File3
User1	O & E		W
User2		O & R* & W*	O & R* & W
User3		W	W

# The Security Problem

- Security Violation Categories
- Security Measure Levels
- Encryption
- Linux Security
- gnupg & sha1sum

- Privacy can mean different things in different contexts; different people, cultures, and nations have different expectations about how much privacy a person is entitled to or what constitutes an invasion of privacy.
- Considering all discussions as one of these concepts
  - Right to be let alone (such as one's own home).
  - Limited access (no information collection).
  - Control over information (in the era of big data).
  - States of privacy: solitude, intimacy, anonymity, and reserve.
  - Secrecy: does not apply for any already publicly disclosed.
  - Personhood and autonomy.
  - Self-identity and personal growth.

- Reference: (Any C Language Tutorial)

# The End

- This is the end of the presentation.
